

## Section: Narratives - Needs Assessment

### Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](https://www.psaydn.org/)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

**Section 1 - Needs Assessment:** In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

### Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

Summer programming has been a critical investment in addressing the academic and social emotional needs. To prepare for the Summer 2021, PHP hired a teacher to serve as a Summer Programs Coordinator and coordinate individualized summer plans for over 200

students. School Leadership and the Summer Programs Coordinator reviewed attendance data and benchmark testing to identify students with academic needs. We then met with teachers and the school social worker to recommend students who could benefit from academic, social emotional or trauma supports. Finally, we surveyed all families to sign up for in-person and remote programming that met their family's individual needs.

## Section: Narratives - Summer School Program Questions

**Summer School Program Questions:** In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

- Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children with Disabilities	Academic Growth	50	Attendance in summer program, academic growth (reading and math levels).
Children from Low-Income Families	Academic Growth	170	Attendance in summer program, academic growth (reading and math levels).

- Describe the evidence-based resources that will be used to support student growth during the summer school program.

Students experienced variety of challenges during the pandemic. Rather than provide a once-size-fits-all approach to student need, PHP believed in providing curated summer experiences. Some students needed the opportunity to socialize with peers. Others needed significant academic interventions. Others needed therapeutic supports to address deep trauma. Some students needed a layered approach of many of these opportunities. By coordinating inputs between leadership, teachers, and families, we were able to design experiences that met a variety of student needs including: • Full-day, five week summer program that provided ELA and math small group instruction (4 hours) and summer athletic and recreational activities (4 hours) • Online tutoring in ELA and math • Scholarships for community day camps that include sports, horseback riding, swimming, berry picking, theater, etc. • Overnight therapeutic camps for select students • Counseling

- Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
1	Internal Provider	Summer Programs Coordinator
1	Internal Provider	Summer Onsite Manager
6	Internal Provider	Summer Instructors

**a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.**

**b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.**

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Attendance	Daily	90% +
ELA and math levels	Monthly	Growth in proficiency levels that meets or exceeds the pace of 1 year

6. How will the LEA engage families in the summer school program?

PHP will continue to reach out to families to understand their priorities and individual needs for students. We'll do so through family meetings and surveys. Their input will inform both the design of our overall programming as well as individual student experiences.
